Attorney for Plaintiff CHRISTINE BARREIROS

**IN THE UNITED STATES DISTRICT COURT**  
**NORTHERN DISTRICT OF CALIFORNIA**  
**SAN FRANCISCO DIVISION**

CHRISTINE BARREIROS, an individual,

Plaintiff,

v.

BAYER HEALTHCARE LLC, a Delaware corporation; BAYER HEALTHCARE PHARMACEUTICALS, INC., a Delaware corporation; BAYER ESSURE, INC., a Delaware corporation; and DOES 1-10, inclusive

Defendants

Case No.:

**COMPLAINT FOR DAMAGES AND DEMAND FOR JURY TRIAL**

- (1) Manufacturing
- (2) Design Defect
- (3) Negligence
- (4) Failure to warn
- (5) Strict Liability
- (6) Breach of Implied Warranty
- (7) Breach of Express Warranty
- (8) Negligent Misrepresentation
- (9) Fraudulent Misrepresentation
- (10) Fraud by Concealment

COMES NOW Plaintiff CHRISTINE BARREIROS, and files this Complaint seeking judgment against Defendants BAYER HEALTHCARE LLC; BAYER HEALTHCARE PHARMACEUTICALS, INC.; BAYER ESSURE, INC.; and DOES 1 through 10 inclusive, (hereinafter collectively referred to as “Defendants” or “Bayer”) for personal injuries suffered as a result of Plaintiff CHRISTINE BARREIROS (hereinafter “Plaintiff”) being prescribed and using the defective and unreasonably dangerous product Essure®. At all times relevant hereto, Essure® was manufactured, designed, formulated tested, packaged, labeled, produced, created, made, constructed,

1 assembled, marketed, advertised, distributed and sold by Defendants or by Conceptus, Inc. which  
2 merged with Bayer on or about April 28, 2013.

3 **I. PARTIES, JURISDICTION AND VENUE**

4 1. This Court has diversity subject matter jurisdiction over this action pursuant to 28  
5 U.S.C. §1332(a): The district courts shall have original jurisdiction of all civil actions where the  
6 matter in controversy exceeds the sum or value of \$75,000.00, exclusive of interest and costs, and is  
7 between (1) citizens of different states. Damages to Plaintiff are estimated in good faith to exceed  
8 the sum or value of \$75,000.00, exclusive of interest and costs. The Court also has personal  
9 jurisdiction over the parties because Plaintiff submits to the jurisdiction of the Court and Defendants  
10 systematically and continually conducts business here and Conceptus, Inc. (“Conceptus”), a wholly  
11 owned subsidiary of Bayer A.G. and/or Bayer Healthcare LLC, is headquartered in Mountain View,  
12 California. Conceptus, which is now part of Bayer, designed, developed, conducted clinical trials  
13 and manufactured Essure® at its Mountain View, California facilities.

14 2. This Court has supplemental jurisdiction over the remaining common law and state  
15 claims pursuant to 28 U.S.C. §1367.

16 3. Venue is proper in this Court pursuant to 28 U.S.C. §1391 because a substantial part  
17 of the events giving rise to Plaintiff’s claims occurred, in part, in the Northern District of California,  
18 including the design, clinical testing, marketing and manufacturing of the Essure® system.

19 4. At all times relevant hereto, Plaintiff is and was a resident of Mesa, Arizona.

20 5. Defendant BAYER HEALTHCARE LLC is a for-profit corporation incorporated in  
21 the state of Delaware. Defendant is authorized to and does business throughout the states of  
22 California and Arizona.

23 6. Defendant BAYER ESSURE INC. is a for-profit corporation incorporated in the state  
24 of Delaware. Defendant is authorized to and does business throughout the states of California and  
25 Arizona.

26 7. Defendant BAYER PHARMEUCITALS, INC., is a for-profit corporation  
27 incorporated in the state of Delaware. Defendant is authorized to and does business throughout the  
28 states of California and Arizona.

**II. FACTS AND ALLEGATIONS COMMON TO ALL CLAIMS**

1           8.       This Complaint is brought by Plaintiff who relied on express warranties of Defendants  
2 before being implanted with a female birth control device, known as “Essure.” As a result of (1)  
3 Defendants negligence described *infra* and (2) her reliance on Defendants’ warranties, Defendants’  
4 Essure® device was placed in both of her fallopian tubes. After the device was implanted, Plaintiff  
5 has suffered from migraines, severe abdominal, ovarian and pelvic pain, sharp, stabbing pain, pain  
6 during intercourse, heavy bleeding, emotional pain and mental anguish.

7           9.       Essure® had Conditional Premarket Approval (“CPMA”) by the Food and Drug  
8 Administration (“FDA”). As discussed herein, this CPMA became “invalid” and the product  
9 “adulterated” pursuant to the FDA due to Defendants’ failure to comply with the CPMA order. As a  
10 result, Defendants’ CPMA is “invalid” and its “adulterated” product, Essure®, should never have  
11 been marketed or sold to Plaintiff.

12           10.      Plaintiff’s first cause of action is based in Defendants’ negligence in (1) failing to  
13 adequately train Plaintiff’s implanting physician (“the implanting physician”); and (2) entrusting the  
14 implanting physician with specialized hysteroscopic equipment he was not qualified to use, and (3)  
15 distributing the product in an unreasonably dangerous manner, as fully discussed below.

16           11.      The training, entrustment, of specialized hysteroscopic equipment to the implanting  
17 physician and method of distribution did not have CPMA by the FDA.

18           12.      Plaintiff’s second cause of action is based entirely on the express warranties made by  
19 Defendants to Plaintiff, which were relied upon by Plaintiff prior to having the device implanted.

20           13.      Notwithstanding the fact that Plaintiff’s two causes of action **fall outside the purview**  
21 **of the MDA**, Defendants’ CPMA is “invalid” and Essure® is an “adulterated” product per the FDA.

22           14.      In short, according to the FDA, the CPMA order became invalid because Defendants  
23 failed to comply with any of the following express conditions:

24                   (a) “Within 10 days after Defendant receives knowledge of any adverse reaction to  
25 report the matter to the FDA.”

26                   (b) “Report to the FDA whenever it receives information from any sources that  
27 reasonably suggests that the device may have caused or contributed to a serious injury.”

28           15.      The fact that Defendants failed to comply with these conditions is not a mere  
allegation made by Plaintiff. It is an **FDA finding**.

1 16. As discussed in detail *infra*, Defendants were **cited by the FDA** and the **Department**  
2 **of Health** for (1) **failing to report and actively concealing 8 perforations which occurred as a**  
3 **result of Essure®**; (2) erroneously using non-conforming material in the manufacturing of Essure®;  
4 (3) failing to use pre-sterile and post-sterile cages; (4) manufacturing Essure® at an unlicensed  
5 facility and (5) manufacturing Essure® for three years without a license to do so.

6 17. These violations invalidated the CPMA, rendering the product “adulterated”-  
7 precluding Defendants from marketing or selling Essure® per the FDA, and, more importantly,  
8 endangered the life of Plaintiff and the safety of the public.

9 18. Defendants actively concealed these violations and never advised Plaintiff of the  
10 same. Had Plaintiff known that **Defendants were concealing adverse reactions, not using**  
11 **conforming material approved by the FDA, not using sterile cages, operating out of an**  
12 **unlicensed facility, and manufacturing medical devices without a license to do the same**, she  
13 never would have had Essure® implanted.

14 **A. Description Of Essure® And How It Works**

15 19. Essure® is a permanent form of female birth control (female sterilization). In short,  
16 the device is intended to cause bilateral occlusions (blockage) of the fallopian tubes by the insertion  
17 of micro-inserts into the fallopian tubes which then anchor and elicit tissue growth, theoretically  
18 causing the blockage.

19 20. Essure® consists of (1) micro-inserts; (2) a disposable delivery system; and (3) a  
20 disposable split introducer. All components are intended for a single use.

21 21. The micro-inserts are comprised of two metal coils which are placed in a woman’s  
22 fallopian tubes via Defendants’ disposable delivery system and under hysteroscopic guidance  
23 (camera).

24 22. The hysteroscopic equipment needed to place Essure® was manufactured by a third  
25 party, is not part of Defendants’ CPMA, and is not a part of Essure®. However, because Plaintiff’s  
26 implanting physician did not have such equipment, Defendants provided it to that they could sell  
27 Essure®.

28 23. The coils are comprised on nickel, steel, nitinol, and PET fibers.

1 24. Defendants' disposable delivery system consists of a single handle which contains a  
2 delivery wire, release catheter, and delivery catheter. The micro-inserts are attached to the delivery  
3 wire. The delivery handle controls the device, delivery and release. Physicians are allowed to  
4 visualize this complicated process through the hysteroscopic equipment provided by Defendants.

5 25. After placement of the coils in the fallopian tubes by Defendants' disposable delivery  
6 system, the micro-inserts expand upon release and anchor into the fallopian tubes. The PET fibers in  
7 the coil allegedly elicit tissue growth blocking off the fallopian tubes.

8 26. The coils are alleged to remain securely in place in the fallopian tubes for the life of  
9 the consumer and do not migrate.

10 27. After three months following the device being implanted, patients are to receive a  
11 "Confirmation" test to determine that the micro-inserts are in the correct location and that the tissue  
12 has created a complete occlusion. This is known as a hystersalpingogram ("HSG Test" or  
13 "Confirmation test").

14 28. Regardless of the Confirmation Test, Defendants also warrant that Essure® allows for  
15 visual confirmation of each insert's proper placement **during the procedure**.

16 29. Essure® was designed, manufactured, and marketed to be used by gynecologists  
17 throughout the world, as a "**quick and easy**" outpatient procedure and without general anesthesia.

18 **B. Evolution Of Essure®**

19 30. Essure® was first designed and manufactured by Conceptus, Inc. ("Conceptus").

20 31. Conceptus and Bayer merged on or about April 28, 2013.

21 32. For purpose of this lawsuit, Conceptus and Bayer are one and the same.

22 33. Essure®, a Class III medical device, is now manufactured, sold, distributed, marketed,  
23 and promoted by Defendants.

24 34. Defendants also trained physicians on how to use its device and other hysteroscopic  
25 equipment, including Plaintiff's implanting physician.

26 35. Prior to the sale of Conceptus to Bayer, Conceptus obtained CPMA for Essure®.

27 36. By way of background, Premarket Approval ("PMA") is the FDA process of scientific  
28 and regulatory review to evaluate the safety and effectiveness of Class III medical devices.  
According to the FDA, Class III devices are those that support or sustain human life, are of

1 substantial importance in preventing impairment of human health, or which present a potential,  
2 unreasonable risk of illness or injury.

3 37. PMA is a stringent type of device marketing application required by FDA. The  
4 applicant must receive FDA approval of its PMA application prior to marketing the device. PMA  
5 approval is based on a determination by the FDA.

6 38. An approved PMA is, in effect, a private license granting the application (or owner)  
7 permission to market the device.

8 39. FDA regulations provide 180 days to review the PMA and make a determination. In  
9 reality, the review time is normally longer. Before approving or denying a PMA the appropriate  
10 FDA advisory committee may review the PMA at a public meeting and provide FDA with the  
11 committee's recommendation on whether FDA should approve the submission.

12 40. According to the FDA, a class III device that **fails to meet the CPMA** requirements is  
13 considered to be **adulterated under section 501(f)** of the Federal Food, Drug and Cosmetic Act  
14 (“FD&C Act”) **and cannot be marketed**.

15 41. Regarding the Premarket Approval Process, devices can either be “approved,”  
16 “conditionally approved,” or “not approved.”

17 42. Essure® was “**conditionally approved**” or in other words, had only CPMA not  
18 outright PMA, the “gold standard.”

19 43. In the CPMA Order issued by the FDA, the FDA expressly stated, “Failure to comply  
20 with the conditions of approval **invalidated this approval order**.” The following were the  
21 conditions of approval:

22 (a) “Effectiveness of Essure is established by annually reporting on the 745  
23 women who took part in clinical tests.”

24 (b) “Successful bilateral placement of Essure is documented for newly trained  
25 physicians.”

26 (c) “Within 10 days after [Defendant] received knowledge of any adverse reaction  
27 to report the matter to the FDA.”

28 (d) “Report to the FDA whenever it received information from any source that  
reasonably suggested that the device may have caused or contributed to a serious injury,”

1 (e) Warranties are truthful, accurate and not misleading.

2 (f) Warranties are consistent with applicable Federal and State law.

3 44. Although failure to comply with just *one* of the conditions invalidated the CPMA  
4 Order, Defendants failed to comply with *several* conditions; thereby invalidating the CPMA pursuant  
5 to the very language of the CPMA order. Specifically:

6 (a) Defendants failed to timely provide the FDA with reports after 12 months, 18  
7 months and then a final report. All reports failed to meet the respective deadlines.

8 (b) Defendants failed to document successful placement of Essure® concealing  
9 the failure rates.

10 (c) Defendants failed to notice the FDA of several adverse reactions and actively  
11 concealed the same. Most egregiously, Defendants **failed to report eight (8) perforations** which  
12 occurred as a result of Essure® and **was cited for the same by the FDA** via Form 483<sup>1</sup>.

13 (d) Defendants failed to report to the FDA information it received that reasonably  
14 suggested that the device may have caused or contributed to a serious injury thereby concealing the  
15 injuries. Again, Defendants **failed to report eight (8) perforations** which occurred as a result of  
16 Essure® **to the FDA as evidenced in** Form 483.

17 (e) As outlined in “Facts and Warranties” *infra*, Defendants’ warranties were not  
18 truthful, accurate, and not misleading.

19 (f) Defendants’ warranties were not consistent with applicable Federal and State  
20 law.

21 45. By failing to comply with several CPMA conditions, Essure® is also considered to be  
22 an “adulterated” device under section 501(f) of the FD&C Act **and cannot be marketed per the**  
23 **FDA**. However, Defendants continued to market the product to Plaintiff.

24 46. The CPMA also required Defendants to comply with Sections 502(q) and (r) of the  
25 FD&C Act which **prohibits Defendants from offering Essure® “for sale in any State, if its**  
26 **advertising is false or misleading.”**

27 \_\_\_\_\_  
28 <sup>1</sup> Form 483 is issued to firm management at the conclusion of inspection when an FDA investigator has observed any conditions that violate the FD&C Act rendering the device “adulterated.”

1 47. Defendants violated Sections 502(q) and (r) by falsely and misleadingly advertising  
2 the product as described below under “Facts and Warranties.” However, Defendants continued to  
3 sell its product against the CPMA with misleading and false advertising.

4 48. Lastly, per the FDA, “a PMA may be sold to another company” however “the sponsor  
5 **must submit a PMA amendment** to notify the FDA of the new owner... The... supplement should  
6 include: the effective date of the ownership transfer; a statement of the new owner’s commitment to  
7 comply with all the conditions of approval applicable to the PMA; and either a statement that the new  
8 owner has a complete copy of the PMA including all amendment, supplements, and reports or a  
9 request for a copy from the FDA files.”

10 49. There were 36 PMA supplements filed with the FDA in regard to Essure® (P020014).  
11 **None of the PMA supplements included notification of the new owner** (Bayer).

12 50. In short, notwithstanding the fact that Plaintiff’s claims fall outside the purview of the  
13 MDA, (1) the CPMA is invalid **per the FDA**; (2) Essure® is considered an “adulterated” product  
14 that cannot be marketed or sold **per the FDA**; and (3) the invalid CPMA was not properly transferred  
15 to Bayer and, therefore, Defendants does not have any form of PMA for Essure®.

16 **C. Defendant’s Training, Entrustment And Distribution Plan**

17 51. Defendants (1) failed to adequately train the implanting physician on how to use its  
18 delivery system and the hysteroscopic equipment manufactured by a third party; (2) provided  
19 specialized hysteroscopic equipment manufactured by a third party; and (3) created an unreasonably  
20 dangerous distribution plan, all of which were aimed at capitalizing on and monopolizing the birth  
21 control market at the expense of Plaintiff’s safety and well-being.

22 52. Because Essure® was the first device of its kind, the implanting physician was  
23 **trained by Defendants** on how to properly insert the micro-inserts using the disposable delivery  
24 system and was given hysteroscopic equipment by Defendants.

25 53. In order to capture the market, Defendants independently undertook a duty of training  
26 physicians, including the implanting physician, on how to properly use (1) its own mechanism of  
27 delivery and (2) the specialized hysteroscopic equipment manufactured by a third party.  
28

1 54. Regarding Essure®, Defendants' Senior Director of Global Professional Education  
2 stated "**training is the key factor** when clinicians choose a new procedure" and "For the Essure®  
3 procedure, the patient is **not under anesthesia**, therefore a **skilled approach is crucial.**"

4 55. In fact, because gynecologists and Plaintiff's implanting physician were unfamiliar  
5 with the device and how to deliver it, Defendants (1) created a "Physician Training Manual"; (2)  
6 created a simulator called EssureSim; (3) organized limited training courses where Defendants  
7 observed physicians until Defendants believed they were competent; (4) created Essure® Procedure  
8 Equipment Supplies Checklists; and (5) represented to Plaintiff that "Physicians must be signed-off  
9 to perform Essure procedures."

10 56. Defendants provided no training to the implanting physician on how to *remove*  
11 Essure® should it migrate or cause serious medical conditions necessitating its removal.

12 57. Defendants also kept training records on all physicians "signed-off to perform Essure  
13 procedures."

14 58. In order to sell its product and because the implanting physician did not have access to  
15 the expensive hysteroscopic equipment, Defendants **provided the implanting physician with**  
16 **hysteroscopic equipment** which, although is not a part of Essure®, is needed to implant Essure®.  
The entrustment of this equipment is not part of any CPMA.

17 59. Defendants entered into agreements with Johnson & Johnson Co., Olympus America,  
18 Inc., Richard Wolf Medical Instruments Corp., and Karl Storz Endoscopy, America, Inc., (1) to  
19 obtain specialized hysteroscopic equipment to then give to physicians and (2) to increase its sales  
20 force to promote Essure®.

21 60. According to Defendants, these agreements allowed Defendants to "gain market  
22 presence [...] and expend [...] market opportunity by driving adoption among a group of physicians."

23 61. In regard to the entrustment of such specialized equipment, Defendants admitted: "**We**  
24 **cannot be certain how successful these programs will be, if at all.**"

25 62. Defendants "handed out" this equipment to unqualified physicians, including  
26 Plaintiff's implanting physician, in an effort to sell its product.

1 63. Defendants knew or failed to recognize that the implanting physician was not  
2 qualified to use such specialized equipment yet provided the equipment to the unqualified implanting  
3 physician in order to capture the market.

4 64. In return for providing the hysteroscopic equipment, **Defendants required that the**  
5 **implanting physician purchase two Essure® “kits” per month.** This was part of Defendants’  
6 unreasonably dangerous and negligent distribution plan aimed solely at capturing the market with  
7 reckless disregard for the safety of the public and Plaintiff.

8 65. Defendants’ distribution plan included requiring the implanting physician to purchase  
9 two (2) Essure® “kits” per month, **regardless of whether he or she used them or not.** This  
10 distribution plan created an environment which induced the implanting physician to “push” Essure®  
11 and implant the same into Plaintiff.

12 66. In short, Defendants used the expensive hysteroscopic equipment to induce the  
13 implanting physician into an agreement as “bait.” Once the implanting physician “took the bait,” he  
14 was required to purchase 2 Essure® “kits” per month, regardless of whether he sold any Essure®  
15 “kits.”

16 67. This was an unreasonably dangerous distribution scheme as it compelled the  
17 implanting physician to sell two (2) devices per month at the expense of Plaintiff’s safety and well-  
18 being.

19 68. Defendants’ distribution plan also included (1) negligently distributing Essure®  
20 against FDA order and sections 501(f), 502(q) and (r) of the FD&C Act by marketing and selling an  
21 adulterated product; (2) the promotion of Essure® through representatives of the hysteroscopic  
22 equipment manufacturers, who were not adequately trained nor had sufficient knowledge regarding  
23 Essure®; (3) failing to report and actively concealing eight perforations which occurred as a result of  
24 Essure®; (4) erroneously using non-conforming material in the manufacturing of Essure®; (5) failing  
25 to use pre-sterile and post-sterile cages; (6) manufacturing Essure® at an unlicensed facility and (7)  
26 manufacturing Essure® for three years without a license to do so.

27 69. In short, Defendants (1) failed to adequately train the physicians on how to use its  
28 delivery system and the hysteroscopic equipment manufactured by a third party; (2) provided  
specialized hysteroscopic equipment to implanting physicians who were not qualified to use the

1 same; and (3) created an unreasonably dangerous distribution plan, all of which were aimed at  
2 capitalizing and monopolizing on the birth control market.

3 70. Unfortunately, this was done at the expense of Plaintiff's safety.

4 **D. Plaintiff's History**

5 71. Prior to the operation, Plaintiff went to the implanting physician to discuss options for  
6 permanent sterilization. The implanting physician recommended that Plaintiff have Essure®  
7 implanted in her fallopian tubes instead of a standard tubal ligation procedure.

8 72. In or around July 30, 2013, Plaintiff returned to the implanting physician for the  
9 Essure® procedure. The implanting physician implanted the Essure® coils into both her left and  
10 right fallopian tubes.

11 73. After the procedure to implant the device in 2013, Plaintiff started experiencing severe  
12 constant daily pain. Since the device was implanted, Plaintiff has also suffered from constant pain,  
13 and mental and emotional anguish.

14 74. Plaintiff had a total hysterectomy on January 7, 2015 to control the excruciating pain  
15 caused by the Essure device.

16 75. Plaintiff did not become aware that Essure was the cause of her above-described  
17 physical, emotional, and medical problems until 2015 when she learned, through internet research, of  
18 other women having similar issues.

19 76. Plaintiff did not have knowledge of facts that would lead a reasonable, prudent person  
20 to make inquiry to discover Defendants' tortuous conduct. Under appropriate application of the  
21 discovery rule, Plaintiff's suit was filed well within the applicable statutory limitations period.

22 77. Additionally, Defendants' fraudulent concealment of the relevant facts as described  
23 *infra* toll any relevant statutes of limitations. Most egregiously, Defendant was not only actively and  
24 fraudulently concealing adverse reports of migrations and perforations from Plaintiff, but also from  
25 the FDA. This active concealment is not mere allegation, but evidenced by FDA findings and its  
26 citations to Defendant for failing to report eight (8) perforations.

27 **E. Facts And Warranties**

28 78. First, Defendants negligently trained physicians, including the implanting physician,  
on how to use its device and in hysteroscopic procedures.

1 79. The skills needed to place the micro-inserts as recognized by the FDA panel “are way  
2 beyond the usual gynecologist.”

3 80. Accordingly, Defendants went out and attempted to train the implanting physician on  
4 (1) how to use its device and (2) in hysteroscopy. Defendants (1) created a “Physician Training  
5 Manual”; (2) created a simulator called EssureSim; (3) organized limited training courses-where  
6 Defendants observed physicians until Defendants believed they were competent; (4) created Essure®  
7 Procedure Equipment Supplies Checklists; and (5) represented to Plaintiff that “Physicians must be  
8 signed-off to perform Essure procedure.” Defendants had no experience in training others in  
9 hysteroscopy.

10 81. Defendants failed to adequately train Plaintiff's implanting physicians and provided  
11 hysteroscopic equipment to the implanting physician who was not qualified to use such complicated  
12 equipment.

13 82. A key study found that a learning curve for this hysteroscopic procedure was seen for  
14 procedure time, but not for successful placement, pain, and complication rates, evidencing that  
15 Defendants' training methods were failing<sup>2</sup>.

16 83. Second, Defendants provided hysteroscopic equipment to the implanting physician  
17 who was not competent to use such device. Defendants knew the implanting physician was not  
18 competent to use such sophisticated equipment, yet provided the equipment anyway in order to sell  
19 its product.

20 84. Third, Defendants' distribution plan of requiring the implanting physician to purchase  
21 two (2) Essure® kits a month, was an unreasonably dangerous plan as it compelled the implanting  
22 physician to insist that Essure® be used in Plaintiff.

23 85. Defendants' distribution plan also included (1) negligently distributing Essure®  
24 against FDA order and sections 501(f), 502(q) and (r) of the FD&C Act by marketing and selling an  
25 adulterated product; (2) the promotion of Essure® through representatives of the hysteroscopic  
26 equipment manufacturers, who were not adequately trained nor had sufficient knowledge regarding  
27 Essure®; (3) failing to report and actively concealing (8) perforations which occurred as a result of  
28 Essure®; (4) erroneously using non-conforming material in the manufacturing of Essure®; (5) failing

---

<sup>2</sup> *Learning Curve of Hysteroscopic Placement of Tubal Sterilization Micro-Inserts*, US National Library of Medicine, Janse, JA.

1 to use pre-sterile and post sterile cages; (6) manufacturing Essure® at an unlicensed facility and (7)  
2 manufacturing Essure® for three years without a license to do so.

3 86. Lastly, Plaintiff relied on the following warranties by Defendants and/or its agents,  
4 outlined in the subsequent Paragraphs:

5 **a. Website Warranties**

6 87. Defendants marketed on its website the following:

7 (a) *“Only FDA approved female sterilization procedure to have **zero** pregnancies*  
8 *in the clinical trials.”* However, there were actually **four pregnancies** during the clinical trials and  
9 five pregnancies during the first year of commercial experience. Defendants concealed this  
10 information from Plaintiff.

11 (b) *“There were Zero pregnancies in the clinical trials.”* However, there were  
12 actually **four pregnancies** during the clinical trials and five pregnancies during the first year of  
13 commercial experience. Defendants concealed this information from Plaintiff.

14 (c) *“Physicians must be signed-off to perform Essure procedure.”* However,  
15 Defendants failed to adequately train the implanting physician and “signed-off” on the implanting  
16 physician who did not have the requisite training. Defendants concealed this information from  
17 Plaintiff.

18 (d) *“Surgery-free.”* However, Essure® is not “surgery-free,” rather laparoscopic  
19 surgery is not required. All Essure® procedures are done under hysteroscopy, which is a surgical  
20 procedure.

21 (e) *“Worry free: Once your doctor confirms that your tubes are blocked, you*  
22 ***never** have to worry about unplanned pregnancy.”* However, several pregnancies have been reported  
23 subsequent to confirmation. Defendants concealed this information from Plaintiff. However, from  
24 1997 to 2005, 64 pregnancies were reported to Defendants. Defendants concealed this information  
25 from Plaintiff. However, Adverse Event Report ESS 205 dated 10/3/2006 evidences a pregnancy  
26 after the three month Confirmation Test was confirmed. Defendants concealed this information from  
27 Plaintiff. However, there have been over 30 pregnancies after “doctors confirmed the tubes were  
28 blocked.” However, women who have Essure® have **10 times greater risk** of pregnancy after one

1 year than those who use laparoscopic sterilization. At ten years, the risk of pregnancy is almost four  
2 (4) times greater<sup>3</sup>.

3 (f) *“Essure is the most effective permanent birth control available-even **more***  
4 ***effective than tying your tubes or a vasectomy.**”* Yet, Defendants’ SEC filings, Form 10-K show  
5 that Defendants never did a comparison to a vasectomy or tubal ligation. Defendants stated, **“We**  
6 **did not conduct a clinical trial to compare the Essure procedure to laparoscopic tubal ligation.”**

7 Defendants concealed this information from Plaintiff. In fact, women who have Essure® have 10  
8 times greater risk of pregnancy after one year than those who use laparoscopic sterilization. At ten  
9 years, the risk of pregnancy is almost 4 times greater<sup>4</sup>.

10 (g) *“Correct placement...is **performed easily** because of the design of the micro-*  
11 *insert.”* However, Defendants admitted that placement of the device requires a “skilled approach”  
12 and even admitted that their **own experts in hysteroscopy** (as compared to general gynecologists not  
13 on the same level as an expert hysteroscopist) failed to place the micro-inserts in 1 out of 7 clinical  
14 participants. Defendants concealed this information from Plaintiff.

15 (h) *“an Essure trained doctor inserts spring-like coils, called micro-inserts...”*  
16 However, the implanting physician who implanted the device was not adequately trained.  
17 Defendants concealed this information from Plaintiff.

18 (i) *“the Essure training program is a comprehensive course designed to provide*  
19 *information and skills necessary to select appropriate patients, perform competent procedures and*  
20 *manage technical issues related to the placement of Essure micro-inserts for permanent birth*  
21 *control.”* However, Defendants failed to adequately train the implanting physician. Defendants  
22 concealed this information from Plaintiff.

23 (j) *“In order to be trained in Essure you **must be a skilled operative hysteroscopist.***  
24 *You will find the procedure easier to learn if you are already proficient in operative hysteroscopy*  
25 *and management of the awake patient. If your skills are minimal or out of date, you should attend a*  
26 *hysteroscopy course before learning Essure.”* However, Defendants “signed off” on the implanting

27 <sup>3</sup> *Probability of Pregnancy After Sterilization: A Comparison Of Hysteroscopic Versus Laparoscopic Sterilization*, Garipey, Aileen.  
Medical Publication "Contraception." Elsevier 2014.

28 <sup>4</sup> *Probability of Pregnancy After Sterilization: A Comparison Of Hysteroscopic Versus Laparoscopic Sterilization*, Garipey, Aileen.  
Medical Publication "Contraception." Elsevier 2014.

1 physician who was not a skilled operative hysteroscopist, in order to monopolize and capture the  
2 market, including the implanting physician. Defendants concealed this information from Plaintiff.

3 (k) “*Essure is a surgery-free permanent birth control.*” However, Essure® is not  
4 permanent as the coils migrate, perforate organs and are expelled by the body.

5 **b. Advertisement Warranties**

6 88. Defendants advertised:

7 (a) “*Zero pregnancies*” in its clinical and pivotal trials. However, there were at  
8 least four pregnancies. Defendants concealed this information from Plaintiff.

9 (b) *In order to be identified as a qualified Essure® physician, a minimum of one*  
10 *Essure® procedure must be performed every 6-8 weeks.* However, Defendants “signed off” on  
11 “Essure physicians” who did not perform the procedure every 6-8 weeks, including the implanting  
12 physician. Defendants concealed this information from Plaintiff.

13 **c. Fact Sheet Warranties**

14 89. Defendants represented in its Fact Sheet:

15 (a) *Data from two clinical studies show that 99 percent of the women who had the*  
16 *Essure® procedure rated their long-term comfort with the micro-inserts as ‘good,’ ‘very good’ or*  
17 *‘excellent.’* However, the actual choices given to the clinical participants were ‘poor,’ ‘very good,’  
18 or ‘excellent’. Defendants concealed this information from Plaintiff.

19 **d. Warranties By Agents**

20 90. Defendants’ Senior Director of Global Professional Education represented to the  
21 public that “*For the Essure procedure, the patient is not under anesthesia, therefore a **skilled***  
22 *approach is crucial.*” Yet, Defendants also claims that “Correct placement...is **performed easily**  
23 because of the design of the micro-insert”

24 91. Defendants’ CEO stated: “*Essure allows you to push away the constant worry about*  
25 *an unplanned pregnancy that’s our message and that’s our theme.*” However, there were actually  
26 **four pregnancies** during the clinical trials and five pregnancies during the first year of commercial  
27 experience. Defendants concealed this information from Plaintiff. However, between 1997—2005,  
28 64 pregnancies were reported to Defendants. Defendants concealed this information from Plaintiff.  
However, there have been over 30 pregnancies after “doctors confirmed the tubes were blocked.”

1 e. Marketing Warranties

2 92. Defendants marketed with commercial stating:

3 (a) *Essure® has been in use for over 5 years.* However, Essure® was only in use  
4 for 4 years at the time of the warranties. Defendants concealed this information from Plaintiff.

5 (b) “The non-surgical” permanent birth control for woman.” However, the  
6 procedure is most commonly done with surgery. Defendants concealed this information from  
7 Plaintiff. However, Essure® is not permanent as the coils migrate, perforate organs and are expelled  
8 by the body. However, all Essure® procedures are done under hysteroscopy, which is a surgical  
9 procedure.

10 93. Defendants created a fake blog entitled “Diary of a Decision” in order to induce  
11 Plaintiff to use Essure®. Defendants created a fictitious person, names “Judy” who pretended to  
12 have had the procedure and answered questions from Plaintiff. However, “Judy” never had the  
13 procedure as represented and was actually Debbie Donovan. Defendants concealed this information  
14 from Plaintiff.

15 94. Defendants warranted that Essure® “allows for visual confirmation of each insert’s  
16 proper placement both during the procedure and during the Essure Confirmation Test.” However,  
17 Essure® does not allow for visual confirmation of proper placement during the procedure evidenced  
18 by the fact that three micro-inserts were placed into Plaintiff.

18 f. Brochure Warranties

19 95. Defendants’ Essure® brochure warrants:

20 (a) “*Worry free.*” However, Defendants **actively concealed** and **failed to report**  
21 **8 perforations** which occurred as a result of Essure® to the FDA evidence in a Form 483 issued  
22 by the FDA to Defendants. Defendants actively concealed this from Plaintiff. *See* Most egregiously,  
23 Defendants were issued another Form 483 when it **“erroneously used non-conforming material.”**  
24 Defendants actively concealed this and were issued an additional Form 483 for “failing to adequately  
25 document the situation.” Defendants actively concealed this from Plaintiff. However, Defendants’  
26 facility was also issued a notice of violation as it **“no longer uses pre-sterile and post-sterile**  
27 **cages.”** Defendants actively concealed this from Plaintiff. However, Defendants were also issued a  
28 notice of violation when **“it failed to obtain a valid license...prior to manufacturing medical**

1 **devices.”** Defendants were manufacturing devices for three years without a license. Defendants  
2 actively concealed this from Plaintiff. However, Defendants were also issued a notice of violation as  
3 it was manufacturing medical devices from 2005 at an unlicensed facility. Defendants actively  
4 concealed this from Plaintiff.

5 (b) *“The Essure inserts stay secure, forming a long protective barrier against*  
6 *pregnancy. They also remain visible outside your tubes, so your doctor can confirm that they’re*  
7 *properly in place.”* However, the micro-inserts do not remain secure but migrate and expelled by the  
8 body. Defendants actively concealed this information from Plaintiff. However, Defendants actively  
9 concealed and **failed to report 8 perforations** which occurred as a result of Essure® to the FDA  
10 as evidenced in Form 483 issued to Defendants by the FDA.

11 (c) *“The Essure inserts are made from the same trusted, silicone free material*  
12 *used in heart stents.”* However, the micro-inserts are not made from the same material as heart stents.  
13 Specifically, the micro-inserts are made of PET fibers which trigger inflammation and scar tissue  
14 growth. Heart stents do not elicit tissue growth. Defendants actively concealed this from Plaintiff.  
15 PET fibers are not designed or manufactured for use in human implantation. Moreover, Defendants  
16 also warranted: “the long-term nature of the tissue response to the Essure micro-insert is not known.”  
17 However, the PET fibers are made of the same materials as the PVT material in vaginal meshes  
18 which have a high rate of expulsion. Most egregiously, Defendants were issued another Form 483  
19 when they **erroneously used non-conforming material.** Defendants actively concealed this and  
20 were issued another Form 483 for “failing to adequately document the situation.”

21 (d) *“Surgery-free.”* However, all Essure® procedures are done under  
22 hysteroscopy, which is a surgical procedure.

23 (e) *“Anesthesia-free.”* However, Essure® is not “anesthesia-free”, rather  
24 anesthesia is not required.

25 (f) Step Two: *“pregnancy cannot occur”*; Step Three: *The Confirmation.*  
26 However, Defendants also state that it is only **after** “The Confirmation” that pregnancy cannot occur,  
27 *i.e.* the complete opposite of what is warranted in the brochure. However, Adverse Event Report  
28 ESS 205 dated 10/3/2006 evidences a pregnancy after the three month confirmation test was  
confirmed. However, between 1997—2005, 64 pregnancies were reported to Defendants.

1 Defendants concealed this information from Plaintiff. However, there have been over 30 pregnancies  
2 after “doctors confirmed the tubes were blocked.” However, there have been incidents where the  
3 micro-inserts were expelled from the body even after the Confirmation Test<sup>6</sup>.

4 (g) “*Essure eliminates the risks, discomfort, and recovery time associated with*  
5 *surgical procedures.*” However, Essure® is not “surgery-free”. Rather laparoscopic surgery is not  
6 required.

7 96. *The PET fibers are what cause the tissue growth.* However, during the PMA meeting  
8 with the FDA, Defendants represented that the **trauma** caused by the expanding coil striking the  
9 fallopian tubes is **what caused the inflammatory response** of the tissue. Defendants concealed this  
10 information from Plaintiff.

11 **g. Essure® Booklet Warranties**

12 97. Defendants’ Essure® booklet warrants:

13 (a) “*This viewable portion of the micro-insert serves to verify placement and does*  
14 *not irritate the lining of the uterus.*” However, the device does irritate the uterus. Defendants  
15 concealed this information from Plaintiff. However, Defendants actively concealed and **failed to**  
16 **report 8 perforations** which occurred as a result of Essure® to the FDA as evidence in Form

17 (b) “*There was no cutting, no pain, no scars...*” However, Plaintiff has  
18 experienced pain as a result of Essure®. Defendants concealed this information from Plaintiff.

19 **h. Data Warranties**

20 98. Summary of Safety and Effectiveness Data states:

21 (a) “*The Essure System provides permanent birth control without invasive surgery*  
22 *or general anesthesia, and their associated risks.*” However, Essure® is not “surgery-free” or  
23 “anesthesia-free,” rather laparoscopic surgery and anesthesia are not required.

24 (b) “*In addition to the above benefits, none of the women in the Essure clinical*  
25 *trials became pregnant.*” However, there were at least four pregnancies during the clinical trials.  
26 Defendants concealed this information from Plaintiff.

1 (c) “*Namely, the Essure system is delivered hysteroscopically without general*  
 2 *anesthesia.*” However, Essure® is not “surgery-free” or “anesthesia-free,” rather laparoscopic  
 3 surgery and anesthesia are not required.

4 **i. PMA Supplement**

5 99. Defendants represented to Plaintiff that it was the expanding coil and tissue growth  
 6 which caused the coil to be attached to the tube, not any type of coating. Yet, in Supplement 18,  
 7 Defendants represented that “A doctor placed the coil at the uterine-fallopian tube junction, where its  
 8 **coating caused it be attached** to the tube.” The coating is a hydrophilic polymer coating produced  
 9 by AST Products, Inc. Defendants actively concealed this from Plaintiff.

10 **j. SEC Filings**

11 100. Defendants warranted that the Essure® system has “**no risks**” for patients because...  
 12 the Essure® system does not involve the use of radiofrequency energy. At the same time,  
 13 Defendants also states that there are limited risks with Essure®.

14 101. “*Our Mountain View, California facility underwent an International Organization for*  
 15 *Standardization (“ISO”) inspection in September 2011 which resulted in continuing approval and*  
 16 *ISO certification through May 2013. In December 2010/January 2011, we underwent an FDA audit;*  
 17 *all findings from the audit were satisfactorily addressed.*” However, Defendants actively concealed  
 18 the following:

19 (a) However, Defendants’ site has been inspected 7 times since 06/25—  
 20 07/09/2002. The most recent FDA audit occurred on 05/30—6/26/2013. The FDA has issued 4 Form  
 21 483 inspectional observations.

22 (b) However, Defendants actively concealed and **failed to report 8 perforations**  
 23 **which occurred as a result of Essure® to the FDA** as evidenced in Form 483.

24 (c) Most egregiously, Defendants were issued another Form 483 when they  
 25 **“erroneously used non-conforming material.”** Defendants actively concealed this and were issued  
 26 another Form 483 for “failing to adequately document the situation.”

27 (d) However, Defendants’ facility was also issued a violation as it **“no longer**  
 28 **uses pre-sterile and post-sterile cages.”**

1 (e) However, Defendants also was issued a violation when it **“failed to obtain a**  
2 **valid license...prior to manufacturing medical devices.”** Defendants were manufacturing devices  
3 for three years without a license.

4 102. The subsequent negligence claims are not products liability causes of action. **The**  
5 **claims have nothing to do with the Essure® product or its invalid CPMA**, but rather (1) the  
6 failure of Defendants to adequately train and instruct the implanting physician and/or (2) the fact that  
7 Defendants provided the implanting physician, who was not a hysteroscopist, with hysteroscopic  
8 equipment in order to sell their product and/or (3) Defendants’ unreasonably dangerous distribution  
9 of Essure®.

10 **FIRST CAUSE OF ACTION**

11 **MANUFACTURING DEFECT**

12 103. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set  
13 forth herein and alleges as follows:

14 104. At all relevant times, Defendants were engaged in the business of selling Essure® in  
15 the states of California and Arizona.

16 105. The Essure® manufactured, designed, formulated, tested, packaged, labeled,  
17 produced, created, made, constructed, assembled, marketed, advertised, distributed, and sold by  
18 Defendants was expected to, and did, reach Plaintiff without substantial change in the condition in  
19 which it was sold.

20 106. Defendants have introduced a product into the stream of commerce which is  
21 dangerous and unsafe in that the harm of Essure® outweighs any benefit derived there from. The  
22 unreasonably dangerous nature of Essure® caused serious harm to Plaintiff.

23 107. Defendants manufactured, marketed, promoted and sold a product that was not  
24 merchantable and/or reasonably suited to the use intended, and its condition when sold was the  
25 proximate cause of the injured sustained by the Plaintiff and Defendants placed Essure® into the  
26 stream of commerce with wanton and reckless disregard for the public safety.

27 108. As a direct and proximate result of Plaintiff’s use of Essure®, she was forced to  
28 undergo a surgical procedure to control the heavy bleeding caused by the Essure® coils.

1 109. Defendants knew and, in fact, advertised and promoted the use of Essure® despite  
2 their failure to test or otherwise determine the safety and efficacy of such use. As a direct and  
3 proximate result of the Defendants' advertising and widespread promotional activity, physicians  
4 began commonly promoting this product as a safe and effective contraceptive.

5 110. Despite the fact that evidence existed that the use of Essure® was dangerous and  
6 likely to place users at serious risk to their health, Defendants failed to disclose and warn of the  
7 health hazards and risks associated with Essure® and in fact acted to deceive the medical community  
8 and public at large, including all potential users of Essure®, by promoting it as safe and effective.

9 111. Defendants knew or should known that physicians and other healthcare providers  
10 began commonly prescribing this product as a safe and effective contraceptive despite its lack of  
11 efficacy and potential for serious permanent side effects.

12 112. There are contraceptives and surgical procedures on the market with safer alternative  
13 designs in that they provide equal or greater efficacy and far less risk.

14 113. As a direct and proximate result of one or more of these wrongful acts or omissions of  
15 the Defendants, Plaintiff suffered profound injuries, required medical treatment, and incurred and  
16 continues to incur medical and hospital expenses.

17 WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory,  
18 and punitive damages, together with interest, costs of suit, attorneys' fees and all such other relief as  
19 the court deems appropriate pursuant to the common law and statutory law.

20 **SECOND CAUSE OF ACTION**

21 **DESIGN DEFECT**

22 114. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set  
23 forth herein and further alleges as follows:

24 115. Defendants were and are engaged in the business of selling Essure® in the States of  
25 California and Arizona.

26 116. The Essure® manufactured, designed, formulated, tested, packaged, labeled,  
27 produced, created, made, constructed, assembled, marketed, advertised, distributed and sold by  
28 Defendants was expected to, and did, reach Plaintiff without substantial change in the condition in  
which it was sold.

1 117. The foreseeable risks associated with the design or formulation of the Essure® is more  
2 dangerous than a reasonably prudent consumer would expect when used in an intended or reasonably  
3 foreseeable manner.

4 118. Defendants manufactured, designed, formulated, tested, packaged, labeled, produced,  
5 created, made, constructed, assembled, marketed, advertised, distributed and sold a product that was  
6 not merchantable and/or reasonably suited to the use intended, and its condition when sold was the  
7 proximate cause of the injuries sustained by the Plaintiff.

8 119. As a direct and proximate cause of Plaintiff's use of Essure®, she was forced to  
9 undergo medical procedures to manage her symptoms, developed severe pain, suffers from migraines  
10 and has undergone numerous procedures.

11 120. Defendants placed Essure® into the stream of commerce with wanton and reckless  
12 disregard for the public safety.

13 121. Defendants knew or should have known that physicians and other healthcare providers  
14 began commonly prescribing this product as a safe and effective contraceptive despite its lack of  
15 efficacy and potential for serious permanent side effects.

16 122. There are contraceptives on the market with safer alternative designs in that they  
17 provide equal or greater efficacy and far less risk.

18 123. As a direct and proximate result of one or more of these wrongful acts or omissions of  
19 Defendants, Plaintiff suffered profound injuries, required medical treatment, and incurred and  
20 continues to incur medical and hospital expenses.

21 WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory  
22 and punitive damages, together with interest, cost of suit, attorneys' fees and all such other relief as  
23 the Court deems appropriate pursuant to the common law and statutory law.

24 **THIRD CAUSE OF ACTION**

25 **NEGLIGENCE**

26 124. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set  
27 forth herein and further alleges as follows:

28 125. Upon information and belief, Defendants failed to use reasonable care in designing  
Essure® in that they:

1 a. failed to properly and thoroughly test Essure® before releasing the system to  
2 market;

3 b. failed to properly and thoroughly analyze the data resulting from the  
4 premarketing tests of Essure®;

5 c. failed to conduct sufficient post-market testing and surveillance of Essure®;

6 d. designed, manufactured, marketed, advertised, distributed, and sold Essure® to  
7 consumers, including Plaintiff, without an adequate warning of the significant and dangerous risks of  
8 Essure® and without proper instructions to avoid the harm which could foreseeably occur as a result  
9 of using the system;

10 e. failed to exercise due care when advertising and promoting Essure®; and,

11 f. negligently continued to manufacture, market, advertise and distribute  
12 Essure® after Defendants knew or should have known of its adverse effects.

13 126. A reasonable manufacturer would or should have known that the risks created by  
14 Essure® are unreasonably greater than that of other contraceptives and that Essure® has no clinical  
15 benefit over such other contraceptives that compensates in whole or part for the increased risk.

16 127. As a direct and proximate result of one or more of these wrongful acts or omissions of  
17 Defendants, Plaintiff suffered profound injuries, required medical treatment, and incurred and  
18 continues to incur medical and hospital expenses.

#### 19 **FOURTH CAUSE OF ACTION**

##### 20 **FAILURE TO WARN**

21 128. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set  
22 forth herein and further alleges as follows:

23 129. Essure® is a defective and therefore an unreasonably dangerous product, because its  
24 labeling fails to adequately warn consumers and prescribers of, among other things, the risk of  
25 migration of the product post-insertion, uterine perforation post-insertion, or the possibility that  
26 device complications such as migration and perforation may cause abscesses, infections, require  
27 surgery for removal and/or may necessitate a hysterectomy, oophorectomy, salpingectomy, uterine  
28 ablation, and cause other complications.

1 130. Defendants manufactured, designed, formulated, tested, packaged, labeled, produced,  
2 created, made, constructed, assembled, marketed, advertised, distributed and sold and otherwise  
3 released into the stream of commerce Essure®, and in the course of same, directly advertised or  
4 marketed the product to consumers or persons responsible for consumers, and therefore had a duty to  
5 warn of the risks associated with the use of Essure®.

6 131. Essure® was under the exclusive control of Defendants and was unaccompanied by  
7 appropriate warnings regarding all of the risks associated with its use. The warnings given did not  
8 accurately reflect the risk, incidence, symptoms, scope or severity of such injuries to the consumer or  
9 physicians. The promotional activities of Defendants further diluted or minimized the warnings given  
10 with the product.

11 132. Defendants downplayed the serious and dangerous side effects of Essure® to  
12 encourage sales of the product; consequently, Defendants placed its profits above its customers'  
13 safety.

14 133. Essure® was defective and unreasonably dangerous when it left the possession of  
15 Defendants in that it contained warnings insufficient to alert Plaintiff to the dangerous risks and  
16 reactions associated with it. Even though Defendants knew or should have known of the risks  
17 associated with Essure®, they still failed to provide warnings that accurately reflected the signs,  
18 symptoms, incident, scope, or severity of the risks associated with the product.

19 134. Plaintiff used Essure® as intended and as indicated by the package labeling or in a  
20 reasonably foreseeable manner.

21 135. Plaintiff could not have discovered any defect in Essure® through the exercise of  
22 reasonable care.

23 136. Defendants, as manufacturers of pharmaceutical drugs and products, are held to the  
24 level of knowledge of an expert in the field and, further, Defendants had knowledge of the dangerous  
25 risks and side effects of Essure®.

26 137. Plaintiff did not have the same knowledge as Defendants and no adequate warning  
27 was communicated to her physician(s).

28 138. Defendants had a continuing duty to warn consumers, including Plaintiff and her  
physicians, and the medical community of the dangers associated with its use, Defendants breached

1 their duty. Under Ninth Circuit federal law, Plaintiff's claims for breach of failure to warn after FDA  
2 approval are not preempted by the Medical Device Act ("MDA"). Stengel v. Medtronic Incorporated,  
3 704 F.3d 1224 (9th Cir. 2013).

4 139. Although Defendants knew, or were reckless in not knowing, of the defective nature  
5 of Essure®, they continued to manufacture, design, formulate, test, package, label, produce, create,  
6 made, construct, assemble, market, advertise, distribute and sell Essure® without providing adequate  
7 warnings and instructions concerning the use of Essure® so as to maximize sales and profits at the  
8 expense of the public health and safety, in knowing, conscious, and deliberate disregard of the  
9 foreseeable harm caused by Essure®.

10 140. As a direct and proximate result of one or more of these wrongful acts or omissions of  
11 Defendants, Plaintiff suffered profound injuries as alleged herein, required medical treatment, and  
12 incurred and continues to incur medical and hospital expenses.

13 WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory  
14 and punitive damages, together with interest, costs of suit, attorneys' fees and all such other relief as  
15 the Court deems appropriate pursuant to the common law and statutory law.

16 **FIFTH CAUSE OF ACTION**

17 **STRICT LIABILITY**

18 141. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set  
19 forth herein and further alleges as follows:

20 142. Defendants are manufacturers and/or suppliers of Essure® and are strictly liable to  
21 Plaintiff for manufacturing, designing, formulating, testing, packaging, labeling, producing, creating,  
22 making, constructing, assembling, marketing, advertising, distributing, selling and placing Essure®  
23 into the stream of commerce.

24 143. Essure®, manufactured and/or supplied by Defendants, was defective in design or  
25 formulation in that when it left the hands of the manufacturer and/or suppliers, it was unreasonably  
26 dangerous. It was more dangerous than an ordinary consumer would expect and more dangerous  
27 than other contraceptives.  
28

1 144. Essure® was defective in design or formulation in that, when it left the hands of the  
2 manufacturer and/or suppliers, the foreseeable risks exceeded the benefits associated with the design  
3 or formulation.

4 145. Essure® was also defective due to inadequate warnings or instructions because the  
5 manufacturer knew or should have known that Essure® created, among other things, a risk of  
6 perforation and migration and associated infections or conditions and the Defendants failed to  
7 adequately warn of these risks.

8 146. Essure® was defective due to inadequate pre-marketing testing.

9 147. Defendants failed to provide adequate initial warnings and post-marketing warnings or  
10 instructions after the manufacturer and/or supplier knew or should have known of the extreme risks  
11 associated with Essure® and continues to promote Essure® in the absence of those adequate  
12 warnings.

13 148. As a direct and proximate result of one or more of these wrongful acts or omissions of  
14 Defendants, Plaintiff suffered profound injuries, required medical treatment, and incurred and  
15 continues to incur medical and hospital expenses.

16 WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory  
17 and punitive damages, together with interest, costs of suit, attorneys' fees and all such other relief as  
18 the Court deems appropriate pursuant to the common law and statutory law.

19 **SIXTH CAUSE OF ACTION**

20 **BREACH OF IMPLIED WARRANTY**

21 149. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set  
22 forth herein and further alleges as follows:

23 150. Defendants manufactured, designed, formulated, tested, packaged, labeled, produced,  
24 created, made, constructed, assembled, marketed, advertised, distributed and sold Essure® as safe for  
25 use by the public at large, including Plaintiff, who purchased Essure®. Defendants knew the use for  
26 which their product was intended and impliedly warranted the product to be of merchantable quality,  
27 safe and fit for use.

28 151. Plaintiff reasonably relied on the skill and judgment of Defendants, and as such their  
implied warranty, in using Essure®.

1 152. Contrary to same, Essure® was not of merchantable quality or safe or fit for its  
2 intended use, because it is unreasonably dangerous and unfit for the ordinary purpose for which it  
3 was used.

4 153. As a direct and proximate result of one or more of these wrongful acts or omissions of  
5 Defendants, Plaintiff suffered profound injuries, required medical treatment, and incurred and  
6 continues to incur medical and hospital expenses.

7 WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory  
8 and punitive damages, together with interest, costs of suit, attorneys' fees and all such other relief as  
9 the Court deems appropriate pursuant to the common law and statutory law.

10 **SEVENTH CAUSE OF ACTION**

11 **BREACH OF EXPRESS WARRANTY**

12 154. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set  
13 forth herein and further alleges as follows:

14 155. The aforementioned designing, manufacturing, marketing, formulating, testing,  
15 packaging, labeling, producing, creating, making, constructing, assembling, advertising, and  
16 distributing of Essure® were expressly warranted to be safe by Defendants for Plaintiff and members  
17 of the public generally. At the time of the making of these express warranties, Defendants warranted  
18 Essure® to be in all respects safe, effective and proper for such purposes.

19 156. Essure® does not conform to these express warranties and representations because  
20 Essure® is not safe or effective and may produce serious side effects.

21 157. As a direct and proximate result of one or more of these wrongful acts or omissions of  
22 Defendants, Plaintiff suffered profound injuries, required medical treatment and incurred and  
23 continues to incur medical and hospital expenses.

24 WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory  
25 and punitive damages, together with interest, costs of suit, attorneys' fees and all such other relief as  
26 the Court deems appropriate pursuant to the common law and statutory law.

27 **EIGHT CAUSE OF ACTION**

28 **NEGLIGENT MISREPRESENTATION**

1 158. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set  
2 forth herein and further alleges as follows:

3 159. Defendants, having undertaken the designing, manufacturing, marketing, formulating,  
4 testing, packaging, labeling, producing, creating, making, constructing, assembling, advertising, and  
5 distributing of Essure®, owed a duty to provide accurate and complete information regarding  
6 Essure®.

7 160. Defendants falsely represented to Plaintiff that Essure® was an effective contraceptive  
8 option. The representations by Defendants were in fact false, as Essure® is not safe and is dangerous  
9 to the health of its users.

10 161. At the time the aforesaid representations were made, Defendants concealed  
11 information about the propensity of Essure® to cause great harm from Plaintiff and her health care  
12 providers.

13 162. Defendants negligently misrepresented claims regarding the safety and efficacy of  
14 Essure® despite the lack of information regarding same.

15 163. These misrepresentations were made by Defendants with the intent to induce Plaintiff  
16 to use Essure®, which caused her injury.

17 164. At the time of Defendants' misrepresentations and omissions, Plaintiff was ignorant of  
18 the falsity of these statements and reasonably believed them to be true.

19 165. Defendants breached their duties to Plaintiff by providing false, incomplete and/or  
20 misleading information regarding their product.

21 166. Plaintiff reasonably believed Defendants' representations and reasonably relied on the  
22 accuracy of those representations when agreeing to treatment with Essure®.

23 167. As a direct and proximate result of one or more of these wrongful acts or omissions of  
24 Defendants, Plaintiff suffered profound injuries, required medical treatment, and incurred and  
25 continues to incur medical and hospital expenses.

26 WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory  
27 and punitive damages, together with interest, costs of suit, attorneys' fees and all such other relief as  
28 the Court deems appropriate pursuant to the common law and statutory law.

168. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set forth herein and further alleges as follows:

169. Defendants, having undertaken the designing, manufacturing, marketing, formulating, testing, packaging, labeling, producing, creating, making, constructing, assembling, advertising, and distributing of Essure® described herein, owed a duty to provide accurate and complete information regarding Essure®.

170. Defendants fraudulently misrepresented material facts and information regarding Essure® including, but not limited to, its propensity to cause serious physical harm.

171. At the time of Defendants' fraudulent misrepresentations and omissions, Plaintiff was unaware and ignorant of the falsity of the statements and reasonably believed them to be true.

172. Defendants knew this information to be false, incomplete and misleading.

173. Defendants intended to deceive and mislead Plaintiff so that she might rely on these fraudulent misrepresentations.

174. Plaintiff had a right to rely on and did reasonably rely upon Defendants' deceptive, inaccurate and fraudulent misrepresentations.

175. As a direct and proximate result of one or more of these wrongful acts or omissions of Defendants, Plaintiff suffered profound injuries, required medical treatment, and incurred and continues to incur medical and hospital expenses.

WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory and punitive damages, together with interest, costs of suit, attorneys' fees and all such other relief as the Court deems appropriate pursuant to the common law and statutory law.

**TENTH CAUSE OF ACTION**

**FRAUD BY CONCEALMENT**

176. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set forth herein and further alleges as follows:

177. Defendants had a duty and obligation to disclose to Plaintiff that Essure® was dangerous and likely to cause serious health consequences to users when used as prescribed.

1 178. Defendants intentionally, willfully, and maliciously concealed and/or suppressed the  
2 facts set forth above from Plaintiff with the intent to defraud her as herein alleged.

3 179. Neither Plaintiff nor her physicians were aware of the facts set forth above, and had  
4 they been aware of said facts would not have prescribed this product.

5 180. As a proximate result of the concealment and/or suppression of the facts set forth  
6 above, Plaintiff has proximately sustained damage, as set forth herein.

7 181. As a direct and proximate result of one or more of these wrongful acts or omissions of  
8 Defendants, Plaintiff suffered profound injuries, required medical treatment, and incurred and  
9 continues to incur medical and hospital expenses.

10 WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory  
11 and punitive damages, together with interest, costs of suit, attorneys' fees and all such other relief as  
12 the Court deems appropriate pursuant to the common law and statutory law.

13 **REQUEST FOR PUNITIVE DAMAGES**

14 182. Plaintiff incorporates by reference all other paragraphs of this complaint as if fully set  
15 forth herein and further alleges as follows:

16 183. At all times relevant herein, Defendants:

- 17 a. knew that Essure® was dangerous and ineffective;
- 18 b. concealed the dangers and health risks from Plaintiff, physicians, pharmacists,  
19 other medical providers, the FDA, and the public at large;
- 20 c. made misrepresentations to Plaintiff, her physicians, hospitals and medical  
21 providers and the public in general as previously stated herein as to the safety and efficacy of  
22 Essure®; and,
- 23 d. with full knowledge of the health risks associated with Essure® and without  
24 adequate warnings of the same, manufactured, designed, formulated, tested, packaged, labeled,  
25 produced, created, made, constructed, assembled, marketed, advertised, distributed and sold Essure®  
26 for routine use.

27 184. Defendants, by and through officers, directors, managing agents, authorized sales  
28 representatives, employees and/or other agents who engaged in malicious, fraudulent and oppressive

1 conduct towards Plaintiff and the public, acted with willful and wanton and/or conscious and reckless  
2 disregard for the safety of Plaintiff and the general public.

3 185. As a direct and proximate result of one or more of these wrongful acts or omissions of  
4 Defendants, Plaintiff suffered profound injuries that required medical treatment and incurred medical  
5 and hospital expenses, for which Plaintiff has become liable.

6 186. Defendants are liable jointly and/or severally for all general, special and compensatory  
7 damages and equitable relief to which Plaintiff is entitled by law. Plaintiff seeks actual and punitive  
8 damages from Defendants and alleges that the conduct of Defendants was committed with knowing,  
9 conscious, reckless, deliberate and grossly negligent disregard for the rights and safety of consumers,  
10 including Plaintiff herein, thereby entitling Plaintiff to punitive damages in an amount appropriate to  
11 punish Defendants and deter them from similar conduct in the future.

12 WHEREFORE, Plaintiff demands judgment against Defendants for compensatory, statutory  
13 and punitive damages, together with interest, costs of suit, attorney's fees and all such other relief as  
14 the Court deems appropriate pursuant to the common law and statutory law.

15 **RELIEF REQUESTED**

16 WHEREFORE Plaintiff prays for judgment against Defendants and, as appropriate to each  
17 cause of action alleged and as appropriate to the standing of Plaintiff, as follows:

- 18 1. Past and future general damages, the exact amount of which has yet to be ascertained,  
19 in an amount according to proof at the time of trial;
- 20 2. Past and future economic and special damages according to proof at trial;
- 21 3. Loss of earnings and impaired earning capacity according to proof at trial;
- 22 4. Medical expenses, past and future, according to proof at the time of trial;
- 23 5. Past and future pain and suffering damages, including mental and, emotional stress  
24 arising from Plaintiff's physical injuries, according to proof at the time of trial;
- 25 6. Equitable relief as requested and/or as the Court deems just and proper;
- 26 7. Declaratory judgment that Defendants are liable to Plaintiff for all future evaluative,  
27 monitoring, diagnostic, preventative, and corrective medical, surgical, and incidental expenses, costs  
28 and losses caused by Defendants' wrongdoing;

- 1 8. Medical monitoring, whether denominated as damages or in the form of equitable
- 2 relief according to proof at the time of trial;
- 3 9. Punitive or exemplary damages according to proof at the time of trial;
- 4 10. Costs of suit incurred herein;
- 5 11. Pre-judgment interest as provided by law; and
- 6 12. Such other and further relief as the Court may deem just and proper.

## INSTRUCTIONS FOR ATTORNEYS COMPLETING CIVIL COVER SHEET FORM JS 44

### Authority For Civil Cover Sheet

The JS 44 civil cover sheet and the information contained herein neither replaces nor supplements the filings and service of pleading or other papers as required by law, except as provided by local rules of court. This form, approved by the Judicial Conference of the United States in September 1974, is required for the use of the Clerk of Court for the purpose of initiating the civil docket sheet. Consequently, a civil cover sheet is submitted to the Clerk of Court for each civil complaint filed. The attorney filing a case should complete the form as follows:

- I.(a) Plaintiffs-Defendants.** Enter names (last, first, middle initial) of plaintiff and defendant. If the plaintiff or defendant is a government agency, use only the full name or standard abbreviations. If the plaintiff or defendant is an official within a government agency, identify first the agency and then the official, giving both name and title.
- (b) County of Residence.** For each civil case filed, except U.S. plaintiff cases, enter the name of the county where the first listed plaintiff resides at the time of filing. In U.S. plaintiff cases, enter the name of the county in which the first listed defendant resides at the time of filing. (NOTE: In land condemnation cases, the county of residence of the "defendant" is the location of the tract of land involved.)
- (c) Attorneys.** Enter the firm name, address, telephone number, and attorney of record. If there are several attorneys, list them on an attachment, noting in this section "(see attachment)".
- II. Jurisdiction.** The basis of jurisdiction is set forth under Rule 8(a), F.R.Cv.P., which requires that jurisdictions be shown in pleadings. Place an "X" in one of the boxes. If there is more than one basis of jurisdiction, precedence is given in the order shown below.  
 United States plaintiff. (1) Jurisdiction based on 28 U.S.C. 1345 and 1348. Suits by agencies and officers of the United States are included here.  
 United States defendant. (2) When the plaintiff is suing the United States, its officers or agencies, place an "X" in this box.  
 Federal question. (3) This refers to suits under 28 U.S.C. 1331, where jurisdiction arises under the Constitution of the United States, an amendment to the Constitution, an act of Congress or a treaty of the United States. In cases where the U.S. is a party, the U.S. plaintiff or defendant code takes precedence, and box 1 or 2 should be marked.  
 Diversity of citizenship. (4) This refers to suits under 28 U.S.C. 1332, where parties are citizens of different states. When Box 4 is checked, the citizenship of the different parties must be checked. (See Section III below; **NOTE: federal question actions take precedence over diversity cases.**)
- III. Residence (citizenship) of Principal Parties.** This section of the JS 44 is to be completed if diversity of citizenship was indicated above. Mark this section for each principal party.
- IV. Nature of Suit.** Place an "X" in the appropriate box. If the nature of suit cannot be determined, be sure the cause of action, in Section VI below, is sufficient to enable the deputy clerk or the statistical clerk(s) in the Administrative Office to determine the nature of suit. If the cause fits more than one nature of suit, select the most definitive.
- V. Origin.** Place an "X" in one of the six boxes.  
 Original Proceedings. (1) Cases which originate in the United States district courts.  
 Removed from State Court. (2) Proceedings initiated in state courts may be removed to the district courts under Title 28 U.S.C., Section 1441. When the petition for removal is granted, check this box.  
 Remanded from Appellate Court. (3) Check this box for cases remanded to the district court for further action. Use the date of remand as the filing date.  
 Reinstated or Reopened. (4) Check this box for cases reinstated or reopened in the district court. Use the reopening date as the filing date.  
 Transferred from Another District. (5) For cases transferred under Title 28 U.S.C. Section 1404(a). Do not use this for within district transfers or multidistrict litigation transfers.  
 Multidistrict Litigation. (6) Check this box when a multidistrict case is transferred into the district under authority of Title 28 U.S.C. Section 1407. When this box is checked, do not check (5) above.
- VI. Cause of Action.** Report the civil statute directly related to the cause of action and give a brief description of the cause. **Do not cite jurisdictional statutes unless diversity.** Example: U.S. Civil Statute: 47 USC 553 Brief Description: Unauthorized reception of cable service
- VII. Requested in Complaint.** Class Action. Place an "X" in this box if you are filing a class action under Rule 23, F.R.Cv.P.  
 Demand. In this space enter the actual dollar amount being demanded or indicate other demand, such as a preliminary injunction.  
 Jury Demand. Check the appropriate box to indicate whether or not a jury is being demanded.
- VIII. Related Cases.** This section of the JS 44 is used to reference related pending cases, if any. If there are related pending cases, insert the docket numbers and the corresponding judge names for such cases.
- Date and Attorney Signature.** Date and sign the civil cover sheet.

AO 440 (Rev. 06/12) Summons in a Civil Action

**UNITED STATES DISTRICT COURT**

for the

\_\_\_\_\_ District of \_\_\_\_\_

<i>Plaintiff(s)</i>	)	
	)	
	)	
v.	)	Civil Action No.
	)	
	)	
<i>Defendant(s)</i>	)	

**SUMMONS IN A CIVIL ACTION**

To: *(Defendant’s name and address)*

A lawsuit has been filed against you.

Within 21 days after service of this summons on you (not counting the day you received it) — or 60 days if you are the United States or a United States agency, or an officer or employee of the United States described in Fed. R. Civ. P. 12 (a)(2) or (3) — you must serve on the plaintiff an answer to the attached complaint or a motion under Rule 12 of the Federal Rules of Civil Procedure. The answer or motion must be served on the plaintiff or plaintiff’s attorney, whose name and address are:

If you fail to respond, judgment by default will be entered against you for the relief demanded in the complaint. You also must file your answer or motion with the court.

*CLERK OF COURT*
