2	Plaintiffs allege — with personal knowledge as to their own actions and upon
3	information and belief as to the actions of others — as follows:
4	
5	Introduction
6	1. This case arises from PMI Pacific Market International, LLC ("PMI")'s
7	admission in January 2024 that its popular Stanley cups contain lead.1
8	PMI had previously failed to disclose that information — presumably
9	because doing so would have hurt PMI's bottom line. After all, PMI's
10	primary target market is young professional women of childbearing
11	age, such as the four named plaintiffs bringing this Complaint. PMI
12	spends enormous sums to reach this market by paying influencers to
13	advertise Stanley cups as safe, durable products.
14	2 DMI become distant additional distants to the multiple for excess and a constitution
15	2. PMI has marketed its products to the public for years as a safe, practical
16	item especially suitable for young women. But PMI did not disclose its
17	use of lead in manufacturing until January 2024. Rather, it advertises its
18	cups as being "BPA-free" and made of stainless steel while omitting
19	another key ingredient used in its vacuum seal: lead.
20	3. Lead— especially when touched, swallowed, or inhaled — can cause
21	severe developmental problems in children that lead to lifelong negative
22	
23	

See Daryl Austin, *Do Stanley cups contain lead or pose a risk of lead poisoning? Experts weigh in*, Today (Jan. 24, 2024), https://www.today.com/health/news/stanley-cups-lead-rcna135513 ("Stanley is responding to claims that its products contain lead.

1		health effects. ² These effects can include reproductive toxicity,
2		cardiovascular disease, and nervous system damage.3
3 4 5 6 7 8	 4. 5. 	Lead is dangerous even in trace amounts. Despite PMI's assurances that its cups are safe, guidelines issued by the Centers for Disease Control and Prevention state that there is no safe level of lead for children. ⁴ Even very low levels of lead can be toxic over time. ⁵ Plaintiffs bring this action on behalf of themselves and similarly situated
9 10		consumers who purchased Stanley cups in California before Stanley admitted, on or about January 24, 2024,6 that its cups contained lead.
11 12 13 14 15 16 17 18	6.	 All named Plaintiffs, and all members of the putative class, share these characteristics: They bought Stanley cups that contained lead but provided no warnings or disclosures about lead. They were unaware that Stanley cups contained lead. They reasonably believed that Stanley cups were safe, durable, and suitable for household and outdoor use.
20

28		ee supra n.1.

2		fact that the cups contained lead.
3	<i>7</i> .	PMI marketed its products as safe for use by adults and children despite
4		knowing they contain a toxic material that, if the cup were damaged,
5		could expose consumers (including children) to lead. It thus knowingly
6		misled Californians by failing to disclose a fact that reasonable
7		consumers — especially those in PMI's safety-conscious target
8		demographics — would want to know before buying a drinking cup,
9		especially considering that similar products are available that do not use
10		lead or pose any lead-related risks.
11		redu of pose any redu related fisks.
12	8.	When PMI admitted, in January 2024, that reports of Stanley cups
13		containing lead were true, it offered the following explanation. The
14		explanation shows that PMI deliberately used lead in its cups' vacuum
15		seals while knowing that the cups could be damaged even through
16		ordinary use, potentially exposing consumers and their families to lead:
17		Once sealed, this area is covered with a durable stainless steel
18		layer, making it inaccessible to consumers. Rest assured that no
19		lead is present on the surface of any Stanley product that comes
20		into contact with the consumer nor the contents of the product.
21		In the rare occurrence the base cap of a product comes off due
22		to ordinary use and exposes this seal, it is eligible for our
23		Lifetime Warranty ⁷
24		Elleume Warranty
25		
26 —		
27	7	See supra note 1;
28		https://support.stanley1913.com/en/support/solutions/articles/69000850923-dostanley-products-contain-lead

1	9.	PMI had a duty to disclose its use of lead before enticing millions of
2		customers to unwittingly buy its drinkware. Instead of allowing
3		consumers to decide for themselves and their families whether to accept
4		any risks associated with using a lead-containing drinking cup, PMI
5		kept customers in the dark so as not to interfere with its bonanza of
6		influencer-driven sales, especially sales to young women.
7 8	10.	Plaintiffs request a permanent injunction requiring PMI to disclose any
9		lead or other toxins in its products in California; compensatory damages
10		refunding them for all amounts paid for affected Stanley products;
11		punitive damages for PMI's deliberate concealment of its use of lead
12		and of the possibility that damage to a cup could expose consumers to
13		lead; prejudgment interest; attorney fees and costs; and any other relief
14		allowed by law.
15		
16		PARTIES, JURISDICTION, AND VENUE
17	11.	Named plaintiffs Mackenzie Brown, Meiling Robinson, Shea Ritchie,
18		and Nora McCarl are California consumers who bought one or more
19		Stanley-branded cups manufactured by Defendant. Plaintiffs Mackenzie
20		Brown, Meiling Robinson, and Nora McCarl live in Los Angeles and
21		bought one or more Stanley-branded cups in Los Angeles, while Shea
22		Ritchie lives in San Francisco and bought one or more Stanley-branded
23		cups in San Francisco.
24	12.	The putative class members are California consumers who bought a
25		Stanley-branded cup manufactured by PMI that contains lead at any
26		time before PMI's disclosure that its product contains lead.
27		•

1	13.	Defendant PMI Pacific Market International, LLC is a Washington
2		limited liability company with its principal place of business at
3		2401 Elliot Ave. Fl. 4 in Seattle, Washington. PMI advertises and sells its
4		products throughout California, both directly to consumers and through
5		intermediaries. PMI intended to, and did, substantially affect business
6		and commerce within California.
7	14.	Plaintiffs do not know the names of Defendants Does 1–100 and sues
8	14.	them by fictitious names under Civ. Proc. Code § 474.
9		them by fictitious names under Civ. 110c. Code § 474.
10	15.	Upon information and belief, each defendant is responsible in some way
11		for the acts alleged in this Complaint and each proximately caused
12		Plaintiffs' damages. Each was acting as an agent for the others within
13		the scope of that agency and with the others' authorization,
14		participation, or approval.
15	16.	Venue is proper in this Court because PMI conducts substantial
16	10.	business in California; advertised the product to Plaintiffs in Los
1 <i>7</i>		Angeles, California; and enticed Plaintiffs and putative class members
18		to buy PMI's product in Los Angeles.8
19		to buy 1 m s product in los migeres.
20		COMMON ALLEGATIONS
21	4=	
22	1 <i>7</i> .	In 2019, PMI launched a new marketing campaign to increase sales of its
23		Adventure Quencher Travel Tumbler. Aided by social media influencers
24		cultivated by PMI because of their ability to reach PMI's core market of
25		young women, the product's sales skyrocketed. The Stanley brand went
26		from \$70 million in annual sales in previous years to over \$750 million
27 —		
28	8 C	ne named plaintiff, Shea Ritchie, resides in San Francisco, California.

1		in 2023.9 The tumbler has "become the model of choice among a lot of
2		millennial and Gen Z women, many of whom are mothers."10
34567	18.	PMI also advertised its cups for adventurers and for consumers who enjoy an active lifestyle. Though such use increases the chance of damage and lead exposure, consumers were never told that the product contains lead.
8	19.	With the popularity of the Adventure Quencher came the launch and
9		subsequent popularity of other Stanley cups designed with similar sleek
10		aesthetics and utilizing the same insulation system.
11	20.	In January 2024, several viral social media posts broke the news that
12		Stanley cups contain lead. 11 PMI then admitted that the reports were
13		true. ¹²
14		
15	21.	PMI admitted on its website that its popular Stanley-branded cups use
16		lead to "seal the vacuum installation at the base" of the cups. 13 This seal
17		is then covered with a layer of steel, which PMI admits may come off
18		"due to ordinary use" and expose the seal containing the lead. 14

1	22.	Several experts have voiced their opinions that the lead content in
2		Stanley cups is concerning. "[I]f that bottom seal comes off, all bets are
3		off Lead is so toxic you just can't take chances with it," one research
4		director stated. 15 A "broken seal may not always be obvious," 16 and a
5		child who fidgets with that broken bottle faces "a very possible and
6		likely transference of microparticulate lead via normal hand-to-mouth
7		behavior in young children."17
8	23.	Stanlow cure do not includo a Proposition 65 warning about toyic
9	25.	Stanley cups do not include a Proposition 65 warning about toxic
10		chemicals, despite PMI's insistence that it complies with Proposition
11		65.18 This Complaint does not allege a violation of Proposition 65. But
12		Proposition 65 is relevant to the extent it provides guidance as to a
13		reasonable consumer's purchasing decisions in California. 19
14	24.	PMI has claimed (citing no evidence) that using lead to seal insulation is
15		the "industry standard." ²⁰ But other manufacturers use alternative
16		sealing processes that do not require including lead or other toxins in a

1		arinking cup. 24 Consumers had a right to make an informed decision
2		between a Stanley cup or a lead-free alternative — not be misled into
3		believing that Stanley cups were free of harmful materials.
4	25	
5	25.	By selectively disclosing the materials it used through advertising such
6		as "recycled stainless steel" and "BPA free," PMI misled consumers into
7		believing PMI had disclosed all materials the product contained. But
8		had PMI advertised that its Stanley tumblers were made of "stainless
9		steel and lead," profits would undoubtedly have suffered.
10	26.	PMI has advertised its product for rugged outdoor adventures,
11		including by using the term "Adventure" in several of its products (such
12		as its famous "Adventure Quenture"). Yet PMI knew that the seal could
13		be exposed if the product was damaged from falls, hits, and other
14		damage, such as during outdoor activities such as hiking, running, and
15		similar activities.

is critical for their health." 25 The brand highlights multiple images of
families holding Stanley cups on their social media pages. ²⁶

29. A large part of PMI's marketing campaign has included paying influencers with large followings in PMI's target demographics to promote using the Stanley cup while breastfeeding. Paid influencers

Fig. 2. A young mother promotes using a Stanley cup while breastfeeding in an advertisement paid for by PMI. The paid partnership video is still available on Instagram and can be watched by scanning the QR Code as of the date of filing.

²⁵ *Id*.

²⁶ See @stanley_brand, INSTAGRAM, https://www.instagram.com/stanley_brand/ (last visited Feb. 1, 2024).

	have touted Stanley products as "must-haves" for breastfeeding
	mothers. ²⁷
30.	PMI has also spent years campaigning for its products to be perceived
	as healthy, safe, and trendy drinkware for adventurers. Its
	advertisements focus on healthy young people using Stanley products
	while exercising, camping, and playing. Yet all along, PMI knew its
	products were manufactured using a toxic compound and failed to
	notify consumers of this fact or the fact that, if damaged, Stanley
	products could expose consumers to toxic lead.
31.	Plaintiff Mackenzie Brown is an attorney who purchased a popular
	rose-gold Stanley tumbler cup after being bombarded with advertising.
	Brown is the mother of three young children who often carried her cup
	to Little League games and other events. She bought the cup at Dick's
	Sporting Goods as a treat to herself for Mother's Day. It was never
	disclosed to Brown that the cup contained lead, and if she had been tolc
	that fact, she would not have bought the product or introduced it into
	her home.
32.	Plaintiff Meiling Robinson bought PMI's product after it was advertised
	to her for adventurers. Robinson is a competitive sailor and regular
	camper. Robinson used PMI's product while sailing in rough seas and
	while camping, resulting in some damage to the cup. If Robinson had
	known that the product contained lead, she would not have bought or
_	31.

https://www.instagram.com/meganbcall/ (last visited Feb. 1, 2024).

used the product because of the heightened risk of lead exposure due to
her use of the cup for its advertised "adventuring" purpose.
Plaintiff Shea Ritchie is an avid runner who once carried a Stanley cup
in a half marathon. She bought three Stanley cups for her close family
and friends as gifts. Like the other plaintiffs, Ritchie made these
purchases after seeing PMI's advertisements, none of which disclosed
that its products contained lead. In fact, Ritchie had switched to using
Stanley cups for peace of mind because she was concerned about toxins
leaking into the water from the plastic drinkware she had used
previously. Had she known that the Stanley cups contained lead, she
would not have purchased them and would have looked for safe
alternatives.
Plaintiff Nora McCarl bought a Stanley cup just weeks after her young
daughter was born as a way to hydrate more to facilitate breastfeeding.
She routinely saw Stanley Cups promoted on Instagram as ideal for
young mothers like her and had no reason to believe they might contain
a hazardous toxin. McCarl was not warned at any point that the product
contains lead and that it could expose her and her child to lead if the
cup were damages. Had this information been disclosed, McCarl would
not have bought PMI's product.
Under the guise of encouraging young people to stay fit and hydrated,
PMI engaged in misleading advertising that has potentially exposed
individuals and young children to a hazardous material.
Plaintiffs and the putative class members could have chosen to buy one
of PMI's competitors as an alternative. Some of PMI's competitors have
been using lead-free manufacturing for their drinkware for over a

1		decade. ²⁸ But PMI kept the information about the presence of lead in
2		their products from the public, depriving the consumers from the
3		knowledge to make an informed decision about which product to buy.
4		
5		CLASS ACTION ALLEGATIONS
6	37.	Plaintiffs bring this action on their own behalf and on behalf of all
7		persons similarly situated. The putative class that Plaintiffs represent
8		consists of all California-based purchasers of Stanley cups. The persons
9		in the putative class are so numerous, consisting of hundreds of
10		thousands of individuals, that the joinder of all such persons is
11		impracticable and that the disposition of their claims in a class action
12		rather than in individual actions will benefit the parties and the court.
13	20	
14	38.	There is a well-defined community of interest in the questions of law
15		and fact involved affecting the putative class in that PMI's false
16		advertising targeted all putative class members and all putative class
17		members bought the same product without knowledge that the product
18		contained lead. These questions of law and fact predominate over
19		questions that affect only individual putative class members. The claims
20		of Plaintiffs are typical of those of the putative class and Plaintiff will
21		fairly and adequately represent the interests of the putative class.
22	39.	Plaintiffs are informed and believe that each class member's
23		compensatory damages are low and easily established: they equal the
24		amounts expended on Stanley's drinking cups, which have usually sold
25		
26 —		
27		Does Hydro Flask use lead for sealing its bottles and tumblers? Hydro Flask,

27		
28		

1		CAUSES OF ACTION
2	41.	All causes of action are alleged against all defendants.
3	FIRS	r Cause of Action: Violation of Bus. & Prof. Code § 17500 et seq. (False Advertising Law)
567	42.	Each preceding paragraph is realleged and incorporated here by reference.
8 9 10 11 12	43.	The allegations above describe many false advertisements that violate California's False Advertising Law (Bus. & Prof. Code § 17500 et seq.). That law prohibits intentionally or negligently making an untrue or misleading statement about business services with the intent to induce someone to enter into an obligation relating to those services.
13 14 15 16 17 18	44.	The law prohibits "not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public." To state a claim under this law, it is necessary to show only that an ordinary consumer and member of the public is likely to be deceived. 30
20 21 22 23 24 25 26	45.	PMI's false advertisements include, without limitation, falsely holding out their products as risk-free for children, mothers, and other consumers when PMI knew the products contained the toxic material lead.
27 28	²⁹ Ci	hapman v. Skype Inc., 220 Cal. App. 4th 217, 225 (2013).

46. As a result of PMI's actions, Plaintiffs paid money for unsafe products that may cause harm to them or their children. Plaintiffs seek restitution, compensatory damages, punitive damages, prejudgment interest, costs, and attorneys' fees. Plaintiffs also ask the Court to require PMI to disclose the use of lead in its products in all future sales.

1 SECOND CAUSE OF ACTION: FRAUD 2 47. Each preceding paragraph is realleged and incorporated here by 3 reference. 4 48. California recognizes three ways defendants can commit intentional 5 fraud: intentional misrepresentation, concealment, and false promise. 6 The first two are at issue here. 7 8 49. PMI committed intentional fraud through statements (express and 9 implied) made misleading because of PMI's deliberate nondisclosure of 10 its use of lead in Stanley cups. 31 These statements included, for example, 11 PMI advertisements targeting young parents and claiming Stanley cups 12 were an essential resource for new mothers (when, in fact, the cups 13 contained a substance that could cause permanent disabilities in young 14 children), and PMI advertisements suggesting that Stanley cups were 15 especially suited for rugged outdoor adventures (when, in fact, such 16 adventuring created a heightened risk that the cups would be damaged, 17 potentially exposing their owners to lead). PMI also made 18 misrepresentations-through-nondisclosure by disclosing some facts 19 about Stanley cups, such as that they are "BPA free" or made from 20 recycled stainless steel, while not disclosing that the product also 21 contains lead (a dangerous toxin). 22 50. PMI also committed intentional fraud through its deliberate 23 concealment of its use of lead in Stanley cups. Concealment occurs 24 25 26 Fraudulent nondisclosure occurs when the defendant has a duty to disclose facts 27 within its knowledge, but the defendant selectively discloses only certain facts, while intentionally failing to disclose other facts, making the partial disclosure deceptive.

Gutierrez v. Carmax Auto Superstores California, 248 Cal. App. 5th 1234, 1253 (2018).

many of PMI's customers. PMI actively suppressed its use of lead so as to maximize its ability to profit from these consumers, especially its core target demographic of professional women of childbearing age. Reasonable consumers in that demographic are especially likely to be alert to potential safety concerns such as the use of lead in a drinking cup — so PMI deliberately chose not to reveal that manufacturing decision to consumers deciding between Stanley cups and lead-free substitutes. Punitive damages are warranted. Plaintiffs, in reasonable reliance on PMI's misleading representations and nondisclosures, bought Stanley tumbler cups without knowing that they contain lead. Had PMI disclosed its use of lead in the cups, Plaintiffs would not have purchased Stanley cups; rather, they would have opted for a lead-free alternative. PMI knew this to be true for many of its safety-conscious core customers, so it took care not to reveal its practice of using lead while continuing to market its products as safe, pure, and ideal for busy professionals to use at home and elsewhere.	1		when a defendant has a duty to disclose facts within its knowledge but
51. PMI acted with fraudulent intent because it intended to induce consumers to purchase its product by concealing from these consumers the presence of a toxin in a drinking product. PMI's use of lead in Stanley cups is a fact that would be material to the purchase decisions of many of PMI's customers. PMI actively suppressed its use of lead so as to maximize its ability to profit from these consumers, especially its core target demographic of professional women of childbearing age. Reasonable consumers in that demographic are especially likely to be alert to potential safety concerns such as the use of lead in a drinking cup — so PMI deliberately chose not to reveal that manufacturing decision to consumers deciding between Stanley cups and lead-free substitutes. Punitive damages are warranted. 52. Plaintiffs, in reasonable reliance on PMI's misleading representations and nondisclosures, bought Stanley tumbler cups without knowing that they contain lead. Had PMI disclosed its use of lead in the cups, Plaintiffs would not have purchased Stanley cups; rather, they would have opted for a lead-free alternative. PMI knew this to be true for many of its safety-conscious core customers, so it took care not to reveal its practice of using lead while continuing to market its products as safe, pure, and ideal for busy professionals to use at home and elsewhere.	2		intentionally fails to do so. ³²

1	THIRD CA	AUSE OF ACTION: VIOLATION OF BUS. & PROF. CODE § 17200 ET SEQ. (UNFAIR COMPETITION LAW)
2		
3	54.	Each preceding paragraph is realleged and incorporated here by
4		reference.
5	55.	The allegations above describe several unlawful, unfair, or deceptive
6		business practices that violate California's Unfair Competition Law
7		("UCL"). If PMI is entitled to prevail on the false advertising claim, the
8		same conduct giving rise to that cause of action also constitutes an
9		unlawful business practice.
10		anawiai business practice.
11	56.	A violation of California's Bus. & Prof. Code § 17200 may be alleged by
12		"a person who has suffered injury in fact and has lost money or
13		property as a result of the unfair competition."33
14	57.	PMI's unfair, unlawful, or deceptive business practices include, without
15	57.	
16		limitation:
17	•	Marketing products to children and mothers when the products contain
18		lead;
19	•	Failing to disclose that PMI's products contain lead; and
20	•	Marketing products as safe and conducive to a healthy lifestyle.
21		
22	58.	Plaintiffs and the putative class have paid PMI over \$70 million in
23		product sales, and they seek restitution of these amounts. Plaintiffs also
24		ask the Court to enter a permanent injunction requiring PMI to disclose
25		
26

	FOURTH CAUSE OF ACTION: UNJUST ENRICHMENT
59.	Each preceding paragraph is realleged and incorporated here by
	reference.
60.	PMI has been unjustly enriched by selling Plaintiffs a product Plaintiffs
	reasonably believed was made of stainless steel and that, unbeknownst
	to Plaintiffs, contained lead. PMI, as the manufacturer and seller as well
	as the architect of the Stanley marketing campaign, was in a position to
	know of its use of lead, while Plaintiffs had no way to know or reason to
	·
	suspect that the cups used lead. PMI was unjustly enriched because it
	induced consumers to buy its lead-containing cups through deceitful
	marketing, as described above.
61.	In California, "[a]n individual is required to make restitution if he or she
	is unjustly enriched at the expense of another."34
62.	Accordingly, Plaintiff seeks restitution of all amounts that Plaintiffs
	have paid to PMI for Stanley-branded products. This amount will be
	proved at trial but is believed to exceed \$70 million across the putative
	class of California consumers who unknowingly bought Stanley cups
	containing undisclosed lead. Plaintiffs also seek prejudgment interest,
	costs, and attorney fees.

1		REQUEST FOR RELIEF		
2	63.	Plaintiffs request the following relief:		
3	•	A permanent injunction ordering PMI to clearly disclose its use of lead in		
5		all consumer drinking products at the point of sale and on the packaging		
6		of each product;		
7	•	Compensatory damages exceeding \$70 million to refund all amounts paid		
8		by members of the putative class for Stanley cups containing lead;		
9	•	Punitive damages to hold PMI accountable for its deliberate concealment		
10		of its use of lead and deter similar misconduct;		
11	•	Prejudgment interest;		
12	•	Attorneys' fees;		
13	•	Costs of suit; and		
14	•	Any other relief the Court finds appropriate.
